**Turned Away**

Pentagon estimates for why 17- to 24-year-olds wouldn’t qualify for the military, excluding cosmetic reasons.

- **71%** Do not qualify for service
- **31%** Overlapping reasons
- **28%** Medical (includes weight and mental health)
- **29%** Qualify for service
- **8%** Drugs
- **2%** Aptitude
- **2%** Dependents
- **1%** Conduct

Note: Figures don’t add up to 100 due to rounding

**U.S. Army’s enlistment requirements**

- Between 17 (with parental consent) and 34 years of age
- Scored a minimum of 33 out of 99 on Armed Forces Qualification Test, which assesses English, math, science and cognitive skills
- No felony convictions
- No persistent illegal drug use
- No insulin-dependent diabetics
- Meet height/weight standards for age group
- U.S. citizen or foreign national with legal status
- No tattoos on fingers, neck or face
- No ear gauges
- No ADHD medication in past 12 months
- High school diploma or GED with some college credits

*Doesn’t include all requirements, and some can be waived at the Army’s discretion.*

The Wall Street Journal
This paper examines how the U.S. Army in World War I defined, utilized and analyzed the physical and psychological boundaries it imposed on its personnel.
I WANT YOU FOR U.S. ARMY
NEAREST RECRUITING STATION
The first boundary was to conscript over a million men.

Three phases of the Selective Service process:

- Registering men who met the age requirement
- Classifying those men based on a specific criteria
- Mobilizing the selected men by ordering them to a camp

The second boundary was to sort the fit from the unfit and who would be exempted.
REGISTER

A great day of patriotic devotion and obligation.

1918
At this point one sees that in order to expand the Army the government set goals for:

- Quantity
- Age
- Gender
- Physical and mental standards
- Exempted categories

These benchmarks were respected and well-received, and resulted in the nation being able to field a large and effective force by the end of 1918.
Secretary of War Newton Baker
There were two groups of experts used to accomplish this goal:

• The medical community, which performed the physical and mental screening of recruits.

• The psychological community, which screened for intelligence or to match men to jobs according to their skills.

TEST 3

This is a test of common sense. Below are sixteen questions. Three answers are given to each question. You are to look at the answers carefully, then make a cross in the square before the best answer to each question, and in the sample:

**SAMPLE**
- Why do we use shoes? Because
  - they look well
  - they keep us warm
  - they are black

Here the second answer is the best one and is marked with a cross. Begin with No. 1 and keep on until time is called.

1. It is wiser to put some money aside and not spend it all, so that you may
   - prepare for old age or sickness
   - collect all the different kinds of money
   - gamble when you wish

2. Shoes are made of leather, because
   - it is tarnished
   - it is tough, pliable and warm
   - it can be blackened

3. Why do soldiers wear strict watches rather than pocket watches? Because
   - they keep better time
   - they are harder to break
   - they are handy

4. The main reason why stone is used for building purposes is because
   - it makes a good appearance
   - it is strong and lasting
   - it is heavy

5. Why is beef better food than cabbage? Because
   - it tastes better
   - it is more nourishing
   - it is harder to obtain

6. If some one does you a favor, what should you do?
   - try to forget it
   - steal from him if he asks you to
   - return the favor

7. If you do not get a letter from home, which you know was written, it may be because
   - it was lost in the mails
   - you forgot to tell your people to write
   - the postal service has been discontinued

8. The main thing the farmers do is to
   - supply tomatoes
   - make work for the unemployed
   - feel the nation

9. If a man who can't swim should fall into a river, he should
   - yell for help and try to scramble out
   - dive to the bottom and crawl out
   - lie on his back and float

10. Glass insulators are used to fasten telegraph wires because
    - the glass keeps the pole from being burnt
    - the glass keeps the current from escaping
    - the glass is cheap and attractive

11. If your load of coal gets stuck in the mud, what should you do?
    - leave it there
    - get more horses or men to pull it out
    - throw off the load

12. Why are criminals locked up?
    - to protect society
    - to get even with them
    - to make them work

13. Why should a married man have his life insured? Because
    - death may come at any time
    - insurance companies are usually honest
    - his family will not then suffer if he dies

14. In Leap Year February has 29 days because
    - February is a short month
    - some people are born on February 29th
    - otherwise the calendar would not come out right

15. If you are held up and robbed in a strange city, you should
    - apply to the police for help
    - ask the first man you meet for money to get home
    - borrow some money at a bank

16. Why should we have Congressmen? Because
    - the people must be ruled
    - it insures truly representative government
    - the people are too many to meet and make their laws

17. Go to No. 9 above

**Beta Test for Illiterates**
“How intelligent is the Army?”
Lessons of War: Defining Human Boundaries

The necessity to create a large American Army in 1917 illustrates how a nation defined, utilized and analyzed the physical and psychological boundaries it would impose on its citizens.

The limits for age and gender or the criteria for physical and mental health to include who might be exempted were conceptual boundaries that had to be defined.
